Z-CHAIN

EXTREME WINTER PERFORMANCE

Z-Shaped Cross member pattern provides constant contact between the tire, cross member and the road. Easier installation and removal. Greater durability and lower potential for vehicle damage. Superior starting, stopping and cornering performance. Lower operating space requirements around drive tires. Sold in pairs. All fasteners and tensioners included, where required. Clear illustrated instructions included. Meets or exceeds S.A.E. Class "S" clearance requirements. Manganese alloy cross members.

Designed for all high demand, high performance fleets such as tow truck, police and emergency fleets, and other municipality facilities.

SuperZ⁶ and SuperZ⁸

Z performance for vehicles with very limited operating clearance around the drive tires.

For the commercial user. Greater durability and weight savings of at least 20% compared to conventional link tire chains. Approved by CalTrans under minimum chain up requirements over I-80 at Donner Pass.
